Company Profile:

Index which has started its production in 1987 has become an integrated company by managing its sustainable growth process in a controlled manner. In a short period of time, Index which continues its production at its 6000 m² modern technological facility in Manisa Organized Industrial Zone has proven its quality, serving many companies. Index continues its unremitting investments while closely following sectoral developments in the world to sustain its quality standards.

MISSION:

Index is an establishment which adopts customer satisfaction as the main principle, providing high quality and reliable products. Index is different from its domestic and international market competitors with its high quality, affordable price, and on-time delivery capacity. It is well respected by its customers for years.

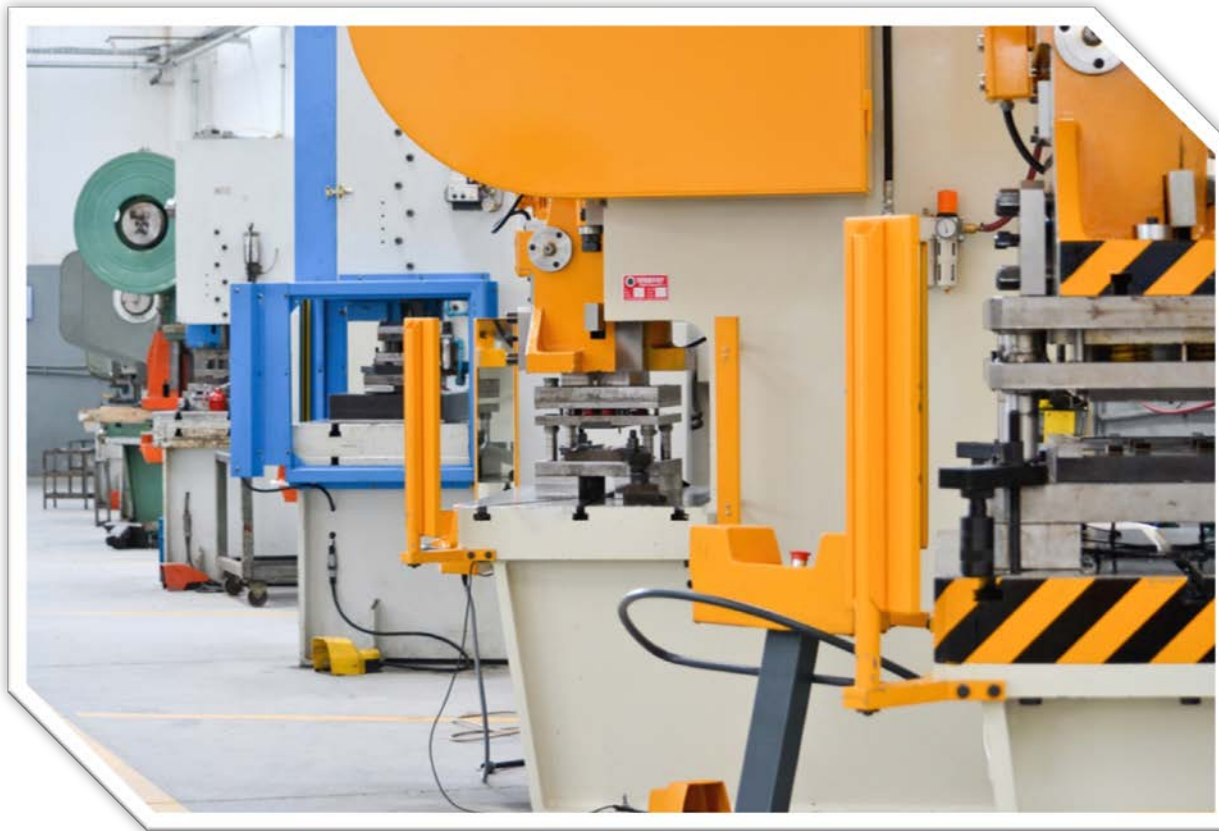

VISION:

Index is a company which acts by understanding the importance of the global market, builds its future on R&D and production development advanced technology investments, and aims to continuously regenerate in quality and performance.

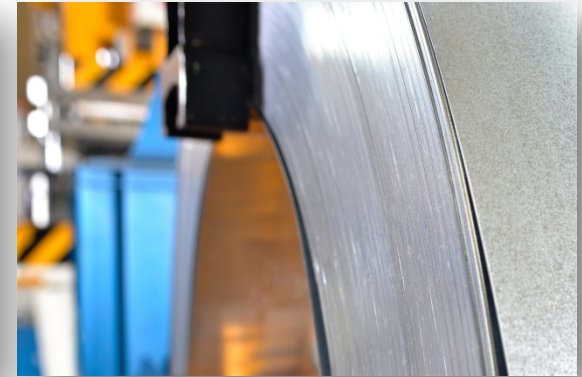

VALUES:

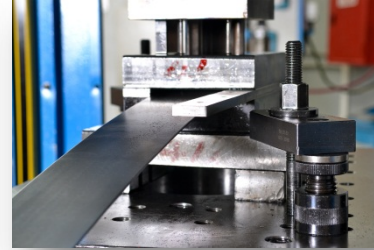

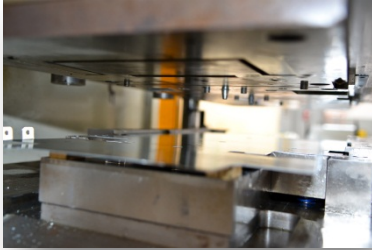

Index, above all, is a company which values before and after sales customer satisfaction, provides social and environmental friendly solutions, fulfilling all of its responsibilities.

Manufacturing:

With its manufacturing machines such as presses that range from 15 tons to 250 tons, guide drilling machine counters, plating baths, etc., Index is a prominent supplier of leading white goods manufacturers as well as a supplier which produces and provides auxiliary materials to leading firms in the automotive sector. Located at K.E.S.S., it continuously increases the speed and quality of its tooling process with its CNC investments that have been developed by innovation.

Index provides tailored service to its customers with its holistic approach to meet customer expectations and satisfaction, being sensitive to environment.

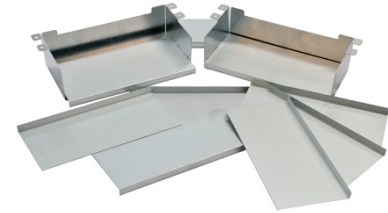

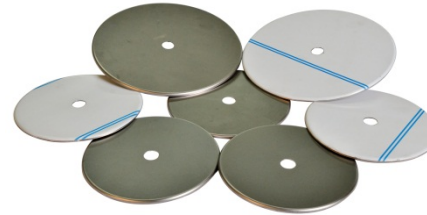

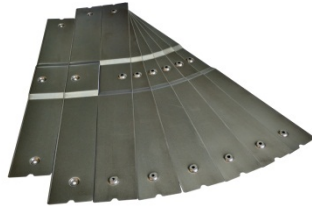

Products:

Index continues its work on sheet metal cutting, bending, plastering metal part mold production and press; all kinds of material production and supply of automat and lathe labor; and metal acid zinc plating production.

Aiming to advance and expand its production range and capacity, Index has enriched its machinery park with new machinery investments. Furthermore, since it focuses on customer satisfaction, it puts emphasis on sustainable functioning of quality management systems.

Quality Control:

Index measures and tests all of its manufactured products meticulously. It is certified with ISO 9001:2008 quality management system, OHSAS 18001 occupational health and labor safety, and ISO 14001 environmental management system.

Logistics:

Manufactured products are packaged by preserving them from outer factors and shipped.
